Beyond Data Management
Designing user-driven data services at UCSF Library

Ariel Deardorff
Data Services and Assessment Librarian
UCSF Library

November 3, 2016
University of California San Francisco
Data Needs Assessment Questions:

What are the frustrations or challenges related to working with research data?

What tools or services do people need access to in order to be more effective researchers?
Methods:

1. Whiteboards: idea generating
2. Campus survey: lots of feedback
3. Focus groups: opinions and ideas
The vision
The reality
What went wrong?
Focus group time!
Programming in Python/R

Documenting data

Sharing data

Accessing and storing clinical data

Software Carpentry workshops

Electronic lab notebook fair

Data sharing talks and consultations
